# Flanged ceramic-lined pipe

Keramik futerovkali truba (flanesli)

Flanged steel pipe whose inner surface is lined with ceramic tiles. The ceramic lining protects the pipe from wear when conveying slurry, sand and other abrasive media.

## Design

- Steel pipe (outer shell)
- Ceramic tiles bonded to the inner surface
- Adhesive (compound) layer between the tiles and the steel, with a protective ring at the ends
- Connection flanges at both ends

### Orders and pricing

Send us the diameter and parameters you need and we will prepare a quote.
